- Switchable shutter modes
- Ultra-compact design

Description

Gigabit Ethernet camera with ON Semiconductor CMOS sensor; 14 frames per second

Mako G-503B/G-503C is a GigE machine vision camera that incorporates the high quality Type 1/2.5 (7.13 mm diagonal) ON Semiconductor MT9P031 (monochrome) / MT9P006 (color) CMOS sensor. At full resolution, this camera runs 14 frames per second. With a smaller region of interest, higher frame rates are possible. Mako G cameras have an ultra-compact form factor and the same mounting positions as many analog cameras. All models include Power over Ethernet (PoE), three opto-isolated outputs, and a 64 MByte image buffer. The image quality profits from the precisely aligned sensor. By default monochrome models ship with no optical filter and color models ship with IRC Hoya C-5000 IR cut filter.

Options:

- Various optical filter and lens mount options
- White medical housing

See the Modular Concept for lens mount, optical filter, and case design options.
